<b>B-Profess</b>	ional Inform	nation	·	•	•					
	<b>Overall Aims</b> :	•								
	This is a spec	ial applied	mandatory one co	urse of th	e 6 mandatory	courses r	equireme	nts of the		
	Diploma. Stu	dents take	this course in the	last term	of the Diplom	a. The co	urse is de	signed to		
	verify the IL	O's of the	program and to	prove t	hat students i	inderstand	l various	types of		
	automatic con	ntrol systen	ns in mechanical p	ower &	energy transfe	r processe	es. This co	ourse has		
	neither term-	work sheets	s, report assignmer	ts nor a	written, forma	l final-teri	n exam. A	ll course		
	grades are t	hus based	upon the in-terr	n project	t progress wo	orks, the	project fi	inal oral		
	presentation &	& the projec	t written technical	report to	be submitted	before the	oral prese	entation.		
	Courseoveral	l aims is to te	st that the students	will be ca	pable to(deper	nding on th	ne project	subject):		
1. Course	-Apply & use h	nis technica	l skills and previou	sly gaine	d knowledge(in	i various a	utomatic o	control		
description:	fields/courses	covered du	ring the diploma) i	n order to	o perform a pr	ofessional	work to d	esign,		
	calculate, ana	lyze, test, re	eport, and present	a practica	l & applicable	automatic	e control s	ystem.		
	-To identify te	echnologica	l and automatic co	ntrol prol	olems of mecha	nical pow	er systems	s and to		
	suggest reasoi	nable, effici	ent, most-economic	e, & effect	tive-optimum s	olutions fo	or those pr	oblems.		
	-To his use pr	ofessional s	kills to select prop	er new teo	hnologies for v	various con	ntrol appli	ications.		
	-To use self-E	-learning a	nd virtual lab prog	rams and	PC application	ns (Mat la	b, AutoCA	D, etc).		
	-To organise &	& manage t	ime and all resourc	es effecti	vely; for short/	long term	commitm	ents.		
	-To manage w	vork entitle	l, perform enginee	ring calcu	lations, transf	er knowled	dge, comm	unicate		
	in written reports and oral forms in English, work in a group , manipulate and sort data, use of							a, use of		
	IT and evolut	ionary tech	nological tools, and	to think	logically.					
	<u>a) Knowledge</u>	and Under	<u>standing:</u>							
	Having succes	ssfully comp	pleted this course,	the post-g	raduate stude	nt should l	have know	ledge and		
	understanding of (depending on the project subject):									
	-Various type	s of automa	tic control systems	in mecha	nical power &	energy tra	ansfer pro	cesses.		
	-Basics, variou	us definition	ions & terminologies associated with automatic control systems.							
	-Requirement	ts of on-line	interactive virtual	labprogra	ams to studyan	d analyze	control sy	stems.		
2. Intended	-Essential com	ponents of c	control loops/circui	ts in man	yapplications of	of mechani	ical power	systems.		
Learning	-Conservation	ieqns.&tra	nsferfunctions of di	fferent ty	pes of automa	tic control	systems/p	rocesses.		
Outcomes	-Basics & requ	irements of	performing ashor	t-term pr	oject in differe	ent automa	tic contro	l fields.		
of Course	-How to integ	rate various	s subjects, knowled	ge, under	standing, & sk	tills into sp	ecific pro	ject task.		
(ILOs):	-Howtointegr	ate human	resources & availa	ble mater	als into team	project du	e at a spec	cific time.		
	b) Intellectual	l Skills:								
	Having succes	ssfully comp	oleted this course, t	he studer	t should have	the ability	to do:			
	-Select and ap	oply approp	riate technical and	optimum	n method in doi	ing engine	ering desig	gn and		
	analysis of au	utomatic co	ntrol problems.							
	-Searching for	r scientific i	nformation and ad	opting au	tomatic contro	ol self-E-lea	arning cap	pabilities.		
	-Analyze and	compare th	e component effect	s, perfori	nance, and effi	iciency of o	different t	ypes of		

1/2

		· · · · · · · · ·	فعنة القالعة						
automatic co	ntrol systems.								
-Apply conce	Apply concepts of software simulation, diagnostics & operation of various practical control systems.								
-Compare be	tween various types of processes, components, & com	plete control system	s/circuits.						
-Apply scien	ply scientific, engineering analysis, and appropriate modelling equation/process, & to select								
best-efficient	components to design, analyze, and solve automatic	control problems.							
c) Profession	<u>ial and Practical Skills:</u>								
Having succ	Having successfully completed this course, the student should have the ability to do:								
-Identify sev	-Identity several types of automatic control problems which are essential for design and								
operation of	operation of mechanical power systems and energy transfer processes.								
-Perform pro	torm protessional design and modelling for different automatic control systems.								
-Suggest pos	est possible alternative solutions for various types of components and parts.								
-Diagnose eff	e efficiency and performance of different types of control circuits/systems.								
- Analyze dif	Analyze different types of processes on real psychometric diagram/plotting schematics.								
d) General a	d) General and Transferable Skills:								
Having succe	Having successfully completed this course, the student should have the ability to do:								
- Performen	- Performengineeringassembly of many processes & components into1-applicable control system.								
- Transfer kn	-Transfer knowledge, Work in group, & Communicate in written & oral forms, in English.								
- Use IT & ev	- Use IT& evolutionary technological tools& PC applications (Excel, Mat lab, Virtual labs, .etc).								
- Prepare&w	rite reports, Manipulate & sort data, Think logically,	and continuous self-	E-learning.						
- Identify pra	ictical problems, compare between different technolo	ogles for HVAC syst	ems.						
-Organise &	manage time & resources effectively; for short-term	and longer-term co	mmitments.						
3. Contents			<b>T</b> ( <b>1</b> )(						
Topics: They depend and	will be different based on the subject of the project	Total Lectures hrs hours P	Tutorial/ Practical hrs						
-This course has neither	formal regular lectures nor term-work sheets, nor								
report assignments. Som	e lectures or other in-term activities may be done	45 hrs							
depending on the subject	of the project.								
4. Teaching and Learning	g Methods: They depend and will be different based	on the subject of the	e project
